Note:

- The above links are only for practice purposes and are meant to help the candidate get comfortable with the digital exam platform. Take your time exploring how the interface works, and treat this as a dry run to remove any tech-related concerns for the actual exam.

- It is only a trial run to practice using the screen interface format, moving between questions, flagging items for review, and managing your time.

- The type of questions in the mock test has been chosen arbitrarily and may or may not have any similarity to the actual exam questions.

- To complete the mock test within a reasonable timeframe, the number of questions in each section has been limited. For details regarding the scheme of the actual question paper, the candidate is advised to check the following link: https://www.rri.res.in/sites/default/files/other-openings/Advt_18_2026_Scheme-of-Exam.pdf

- An on-screen (virtual) calculator will be available for the actual computer-based test. Click on the calculator icon (above "Time Left: " in the top-right area of the screen) to open the calculator.
